 Sigma Aerospace Metals, Germany GmbH, Cuxhavener Str. 45, 28217 Bremen

**To whom it may concern**

Bremen, June 2017

Dear Sirs and Madam,

We would like to present Sigma Aerospace Metals.

Sigma Aerospace Metals has long been a supplier of aircraft quality metals to the aerospace industry. Our Head Office is in New York and since May 2016 we have a subsidiary in Bremen in Germany. During the last year we established our stock here in Bremen where you can find plenty of sheets in several alloys. For all hard to find items we are working with 27 people in total to find and pack what you need and fulfill your demand. With our Head Office in New York and our subsidiary in Germany we are in the position to be very flexible and very fast in reacting. We are working with very reliable logistic partners and we can organize your door to door transport.

We have been the supplier of T. Graae-Specialmetaller for many years and it was always an intense pleasure for us. We thank Torben for the very good business relationship over so many years. Now Torben wants to go into the earned pension and we are very proud that we are the company, which is to carry on Torbens business.

We are looking to a good business relationship with his customers in the future.

Yours Sigma Germany Team

Tanja Behrens and Christine Jaeckel
